Proper Use – Precautions and Care

- Make certain there are fresh alkaline batteries in the transmitter and that they have been installed in the correct position.
- Are the (+) and (−) markings on the alkaline batteries in the same position as the (+) and (−) markings in the Transmitter Battery Compartment?
- Are the metal contact tabs touching, rusty or dirty in the transmitter?
- Has the vehicle been fully charged?
- Make certain that the vehicle ON/OFF switch is in the “ON” position.

Problem - Vehicle moves by itself or exhibits reduced range from the transmitter.
- Make certain there are no outside radio interference in your area. The best way to test this is to take the vehicle as far away from radio towers, electrical lines or tall buildings as possible to ensure no further radio interference will occur.

Always remove Batteries from transmitter when not in use. Do not dispose batteries in fire. Leakage, explosion and personal injury may occur. Do not attempt jumps or tricks with this vehicle. Do not attempt to remove internal battery. Do not use included USB cord for anything other than its intended purpose. Always keep USB cord stored when not in use. Adult supervision recommended.

FCC CAUTION:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reseat or relocate the receiving antenna.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Vehicle Features and Functions

4 Wheel Drive Flexible Chassis
Wheel Alignment
ON/OFF Switch

The ON/OFF Switch controls the main power to the vehicle. To save battery life, always remember to put switch in the OFF position when not in use.

The 4 Wheel Drive Flexible Chassis gives the vehicle the ability to climb steep angles. Each wheel has independent suspension during forward and reverse drive. The vehicle also has elongated shocks and soft tires that help grip the ground.

* Steering Trim Dial is found in between front wheels on the top side of the chassis, under the vehicle body. If vehicle pulls to the left or right during forward driving the Steering Trim may need to be adjusted.

Vehicle Charging the Battery

This vehicle is equipped with an internal Lithium-Ion battery that is recharged via USB. ON/OFF Switch must be in the OFF position prior to charging.

1. Locate the ON/OFF switch and USB cord on the under-side of the vehicle.
2. Turn the ON/OFF switch to the “OFF” position.
3. Slide open Storage Compartment cover.
4. Remove USB cable from the Storage Compartment. (Use care when extending cord as it is attached to inside internal battery). Cord can be plugged into any computer or USB outlet brick (not included).
5. While charging, the LED under the vehicle will be on. Once fully charged the LED will turn off. Charging is completed in approximately 2 - 2.5 hours. Return cord and secure storage lid before operating the vehicle.
